

Reference Sheet 305.04

Conveying equipment

Type of project:	Conveying of dried sludge
Scope of supply:	2 pcs. SU 200 screw conveyors
Capacity:	0-128 kg/h
Client:	BioCon, Denmark

Remark:

The company BioCon in Denmark needed a conveying system for inclined transportation of dried sludge. The solution was the delivery of 2 SU screw conveyors with a Ø200mm trough.

The SU series are designed for horizontal or slightly inclined conveying of free flowing bulk products. As standard, the modular constructed screw conveyors are

supplied with bolted dust-proof top cover which enables easy access for inspection and service.

As standard, the trough conveyor is available in length up to 25 metre consisting of trough sections in 2 metre length and flights in 4-6 metre lengths.
