

Reference Sheet 305.02

Screw dosing conveyor

Type of project:	Conveying and weighing of raw materials
Scope of supply:	24 pcs. SU 300 screw conveyor
Capacity:	65-150 m ³ /h
Client:	KFK, Tjele, Denmark

Remarks:

The system contains 24 SU300 screw conveyors with a length of approximately 4 meter each. The SU series is designed for horizontal or slightly inclined conveying of light products such as grains, fertilizers, powder and grain.

The conveyors are modular constructed with bolted dust proof top cover which enables easy access for inspection and service.

In addition to the weighing installation to raw materials, the delivery also consists of a complete conveying plant, steel construction, silos, boiler plant, compressed air plant, switch board, and a complete vacuum plant to cleaning of the plant.

The screw conveyors are a part of a complete feed stuff plant delivered by Cimbria Bulk Technology A/S.
